APPLES

There are two kinds of apples that are sold in **full** or **half** bushels.

(A "Bushel" is approximately 40-42 pounds)

EMPIRE - This apple is a cross between a Red Delicious and McIntosh made in 1945 by the New York Agriculture Experiment Station and named and introduced in 1966. They are medium sized fruit with dark red skin with a sweet tangy flavor that resembles McIntosh though with better color, flavor and keeping ability.

MUTSU/CRISPIN - This apple is a cross between Golden Delicious and Indo made in 1930 in Japan and introduced in 1948. It was renamed Crispin in England, a name that still persists in the US. The large to extra-large fruit has a yellow green skin with flesh similar to Golden Delicious though, slightly coarser in texture and tarter in flavor. Excellent all-purpose apple (baking, freezing, making apple jelly/apple butter, fresh eating) that keeps well.

Apples are not graded. Both varieties will be two and a half inches or larger.

Full bushel of either kind of apples sells for **\$34.00** and half bushel of either kind sells for **\$20.00**.

PECANS

This year's crop of Georgia pecans are available in 1 pound bags of halves or pieces priced at **\$10.00** per bag. Milk and dark chocolate covered pecan halves, cinnamon glazed halves and chocolate/pecan clusters come in 12 oz. bags and sell for **\$10.00** per bag.
